MOST METRES PER POUND IN THE INDUSTRY!

- Light Weight • Affordable
- Environmentally Friendly
- Safe • Portable • Easy

The NW150 uses 2 industry standard Kubota 1105-T 33 hp diesel engines. The rig boasts an impressive 6500 kg (14,400 lbs) of pullback to drill efficiently, safely and dependably. Its' proven design allows it to go anywhere, set up quickly, and is a breeze to operate and maintain.

The NW150 utilizes 1.5m (5 ft) drill rod and can turn up to HW casing for the top of any hole.

MADE IN CANADA

NW150

The NW150 is great way to get into the industry with a very affordable upfront investment. New design features have now reduced the number of lifts for this rig down to 5 loads never exceeding 171 kg. (375 lbs.). That makes for FAST set up and moves between holes. It is very conservatively rated to 150m using standard N rod.

Groundbreaking Innovations

NW150 Drill Pad & It's Components

- 1 4.27m x 4.27m (14'x14') KD Wooden Platform
- 2 Feed Frame - 6.35mm (1/4") AL
- 3 Sturdy steel mast built tough
- 4 Hydraulic control panel/ Reservoir combo
- 5 2x Kubota 33 hp Diesel motors
- 6 DHP-Pressure Pump to 62 bar (900 psi)
- 7 Fuel Tank & AL Stand
- 8 Mud Tanks & Water Supply
